W. B. EVANS STRONG CANDIDATE FOR CONSTABLE

UNION CONDUCTING CLEAN
CAMPAIGN

Evans, better known as "Bill," the republican candidate for the office of constable of Tonopah township, is making a hard fight for election, and according to his friends, is to be classed as a sure winner. Mr. Evans enjoys a wide acquaintance in Tonopah and is universally popular. No better person could be elected to the constable's office.

For two terms Mr. Evans held the office of president of the Tonopah Miners' union. He served in that office during the Belmont disaster, and for two days and nights he labored for the relief of the miners, endeavoring to rescue those who lost their lives. Afterwards he was instrumental in protecting the interests of the relatives of the miners who met their death. In performing this work Mr. Evans labored without a thought of recompense, merely endeavoring to fulfill the duties demanded of his office.

Mr. Evans is capable of filling the constable's office and can be depended to serve in a creditable manner. He is making a clean campaign and is securing new friends each day. That he is a sure winner is predicted by his hosts of friends and acquaintances.

MEN SHOW SLIGHT GAIN

OVER WOMEN IN THE STATE

WASHINGTON, Oct. 14.—Census bulletin issued today shows there were 1,322,978 males and 1,054,571 females in California in 1910, or 125 males to each 100 females. In 1900 there were 123.5 males to each 100 females.

General Manager S. H. Brady of the Halifax company in discussing the recent developments of that property, stated today that the drift on the 1000-foot level had opened up the ledge encountered in the shaft, and that a good milling grade of ore was being extracted. At the point where the shaft penetrated the ledge the body was about 12 feet in width. However, that same width is not in evidence at the present. The ore is of an exceptionally good grade. The work of cutting a station is also under progress at the 1000-foot point.

On the 1400-foot level drifting is being conducted toward the Belmont line. The drift is now out about 100 feet and is progressing about 7 to 8 feet daily. About 500 feet remains before the Belmont line will be encountered and then a connection will be made for the purpose of securing better ventilation. A small ledge was encountered Friday from which a couple of good assays were secured, according to the statement made by General Manager Brady.

No development or prospecting was done on the ledge, the drift being continued.
